PROFESSIONAL SUMMARY

Every line of code begins as an idea before it becomes a solution. As a Software Engineering student at Addis Ababa Science and Technology University, I see software as more than syntax—it is a language for solving real-world problems. I enjoy designing backend systems, structuring databases, and building applications that transform ideas into practical solutions. Guided by curiosity, discipline, and continuous learning, I aspire to build technology that creates meaningful and lasting impact.

TECHNICAL SKILLS

Programming Languages: Python, C++, JavaScript, SQL
Frameworks & Web: Django, HTML5, CSS3
Databases: SQLite, MySQL, MongoDB
Developer Tools: Git, GitHub, Visual Studio Code, Linux
Core Concepts: OOP, REST API Development, Database Design & Normalization, Django MVT, Computer Networking

PROJECTS

JunubMart *(In Progress)* • *Personal Project*
Python • Django • SQLite
- Developing a marketplace platform tailored for South Sudan.
- Implementing user authentication, product management, shopping cart, seller dashboard, and order management.
- Applying Django MVT architecture and relational database design.

Adaptive Traffic Management System • *Developer*
C++ • SQLite
- Developed a traffic signal simulation system with adaptive traffic control.
- Implemented emergency vehicle priority and integrated SQLite for traffic data storage and analysis.

Food Delivery Management System • *Project Coordinator*
MySQL • MongoDB
- Designed normalized relational database schemas and ER diagrams.
- Coordinated a seven-member software development team.

EDUCATION

Bachelor of Science in Software Engineering
Addis Ababa Science and Technology University (AASTU) 2024 – Expected 2029

PROFESSIONAL DEVELOPMENT

Global Consumer Intelligence (GCI) Program
Matsuo Lab, University of Tokyo
- Selected participant focusing on Artificial Intelligence and Data Science.

INSA Cyber Talent Camp
Information Network Security Administration (INSA)
- Selected for the Software Development track, emphasizing practical software engineering, collaborative development, and cybersecurity awareness.

LEADERSHIP

Chairperson — South Sudanese Students' Union @ AASTU
- Represent student interests and coordinate academic and community activities.
- Promote collaboration, academic excellence, and engagement among South Sudanese students.

CERTIFICATIONS & ACHIEVEMENTS

- Global Consumer Intelligence (GCI) Program — Matsuo Lab, University of Tokyo
- INSA Cyber Talent Camp Participant — Software Development Track
- Government Scholarship Recipient — Addis Ababa Science and Technology University (AASTU)

ADDITIONAL INFORMATION

Soft Skills: Problem Solving • Team Collaboration • Leadership • Communication • Adaptability • Continuous Improvement
Languages: English (Fluent) • Arabic (Fluent) • Dinka (Native)
Interests: Full-Stack Development • System Design • AI • Cybersecurity • Software Architecture • Literature & Philosophy
