Open to internships, freelance work & collaboration

TECHNICAL SKILLS

Languages

Python · C++ · JavaScript · SQL

Frameworks & Web

Django · Node.js · Express.js · Flutter · HTML5 · CSS3

Databases

SQLite · MySQL · MongoDB

Developer Tools

Git & GitHub · VS Code · Linux

Core Concepts

OOP · REST APIs · Database Design · Django MVT · Networking · Security

LANGUAGES

English — Fluent
Arabic — Fluent
Dinka — Native

SOFT SKILLS

Problem solving · Team collaboration · Leadership · Communication · Adaptability

INTERESTS

System & database design · Artificial intelligence · Networking & cybersecurity · Literature & philosophy

"Every line of code begins as an idea before it becomes a solution."

Year 3 Software Engineering student at Addis Ababa Science and Technology University — a South Sudanese engineer learning and building in Addis Ababa. I build practical software — web apps, mobile apps, and the tools in between — and I like understanding how things work end to end. I am deepening my skills in networking, security, and cloud, with one goal: to build, manage, and protect systems.

PROJECTS

JunubMart — Marketplace for South Sudan

Finalizing · Jun – Oct 2026

Personal Project

- Building a Django-powered marketplace that connects buyers, sellers, and property owners across South Sudan
- Implemented authentication and roles, product management, shopping cart, seller dashboard, order management, and property rentals
- Applied Django MVT architecture and relational database design; now in final polish ahead of deployment

Python · Django · SQLite · HTML/CSS · JavaScript · Git & GitHub

Adaptive Traffic Management System

Coursework

Developer

- Built a traffic-signal simulation with adaptive timing driven by queue load, plus an emergency-vehicle priority override
- Integrated SQLite for traffic data logging and analysis

C++ · SQLite

Food Delivery Management System

Coursework

Project Coordinator

- Designed normalized relational schemas and ER diagrams in MySQL, alongside a MongoDB store for order tracking
- Coordinated a seven-member software development team

MySQL · MongoDB

Portfolio Website & API

Personal

Developer

- Designed and built a responsive portfolio with a procedural 3D gear hero (Three.js) and an Express.js server for the contact form

HTML/CSS · JavaScript · Three.js · Node.js · Express.js

EDUCATION

BSc in Software Engineering

2024 – Expected 2029

Addis Ababa Science and Technology University (AASTU) · Currently in Year 3

PROFESSIONAL DEVELOPMENT

INSA Cyber Talent Centre

Ongoing · Jul – Oct 2026

Software Development Track · Information Network Security Administration (INSA)

- Selected for the Software Development track, with an emphasis on practical engineering, collaborative development, and cybersecurity awareness
- Building full-stack projects and secure-coding skills with mentors on real-world national software challenges

Global Consumer Intelligence (GCI) Program

Aug 2026 · Completed

Matsuo-Iwasawa Laboratory, University of Tokyo

- Selected participant in a global AI & data science program, focused on data analysis and consumer intelligence; certificate awarded

LEADERSHIP

Chairperson — South Sudanese Students' Union @ AASTU

- Represent South Sudanese students and coordinate academic and community activities
- Organize meetings and events that promote collaboration, academic excellence, and engagement

CERTIFICATIONS & ACHIEVEMENTS

- GCI Program certificate — Matsuo-Iwasawa Laboratory, University of Tokyo (Aug 2026)
- INSA Cyber Talent Centre — Software Development track (ongoing)
- Government Scholarship Recipient — Addis Ababa Science and Technology University
- Selected participant — GCI Program (University of Tokyo) and INSA Cyber Talent Centre
